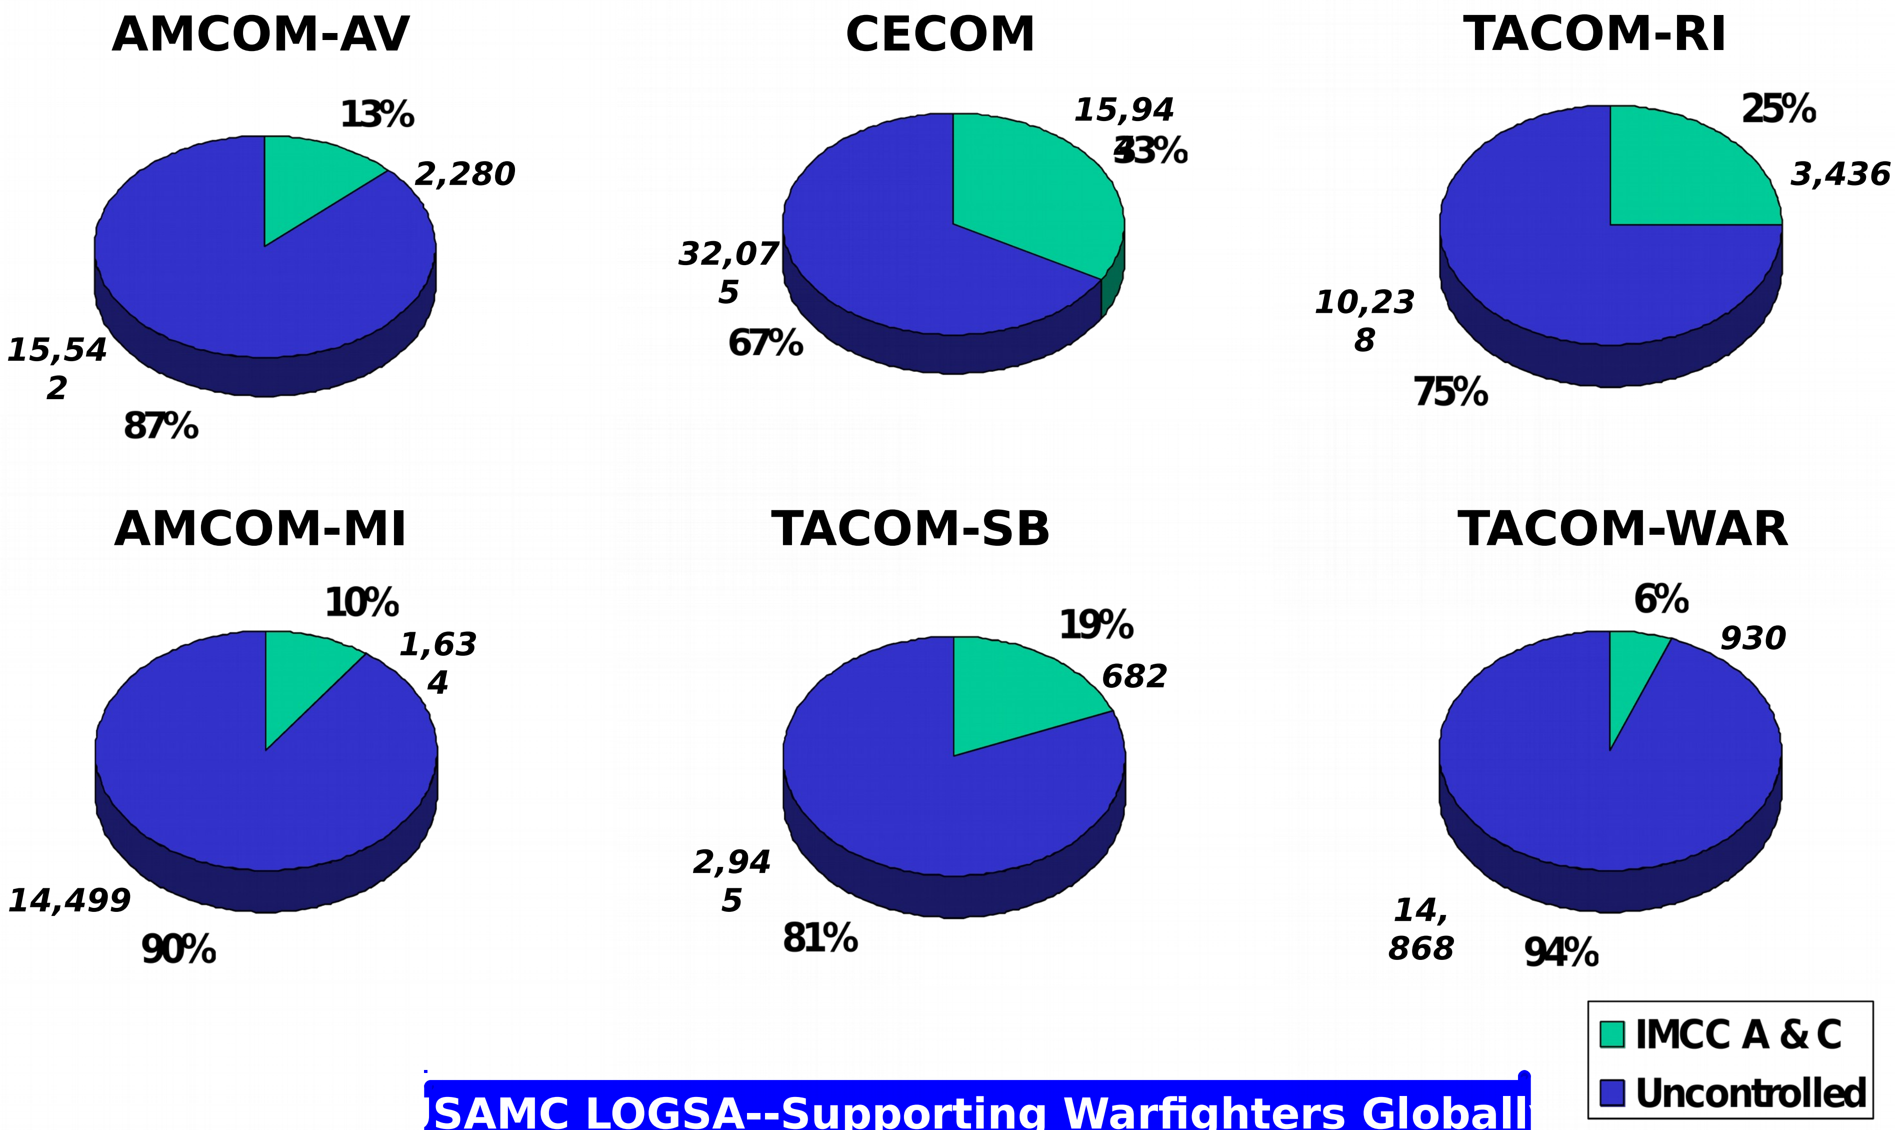
IMCC A and C vs. Online Processing Secondary Items Managed by ICP – Mar 05



Breakout of Controlled Items

	IMCC "A"	IMCC " C"
AMCOM-A	1,098	1,182
AMCOM-M	1,193	441
CECOM	15,701	243
TACOM-W	516	414
TACOM-R	1,593	1,843
TACOM-SB	556	124

IMCC "C" requisitions are run thru the Control Item Logic File (CLF). CLF is an IMMC tool that facilitates automatic processing. CLF completes processing for many "C" coded items based on parameters placed in the CLF, e.g., designated DODAACs, priorities, quantities, etc. Only requisitions not meeting CLF parameters will ever kick off-line for processing.
